EDUCATION

- **Fundação Getúlio Vargas - São Paulo School of Economics (FGV SP)** São Paulo, Brazil
• *Master's and Bachelor's Degrees in Economics (Dual Merit Scholarship)* Jan 2022 – Present

RESEARCH

- **Heatwaves and Delivery Practices: The Effects of Extreme Temperature in Brazilian Maternity Wards:** (joint with Rafael Parfitt) Investigate how extreme heat affects healthcare delivery using data on over 25 million births from Brazilian public hospitals (2008–2019). Combine satellite-based temperature data with high-dimensional fixed effects to assess how temperature shocks influence medical decision-making and labor allocation in maternity wards.
Paper under Review & Resubmit at the *Journal of Development Economics (JDE)*.
- **How does a fraud scandal impact trust in science?:** (joint with Leon Eliezer and Luigi Garzon) Run a randomized information intervention with Brazilian high school students to study how learning about suspected fraud and accountability processes affects trust and behavior towards science.
- **Randomization Inference under Spatiotemporal correlation:** (joint with Bruno Ferman and Luis Alvarez) Develop theoretical foundations for temporal permutation tests allowing arbitrary spatial correlation. Show when standard permutation methods attain correct size and where distortions arise; propose studentization and transformation fixes. Monte Carlo evidence demonstrates superior performance versus clustered and distance-based SEs.

EXPERIENCE

- **São Paulo School of Economics (FGV SP)**
• *Research Assistant to Bruno Ferman, Pedro C. Sant'Anna, and Nicolás Ajzenman* Jun 2023 – Jun 2024
 - **Project:** Examined whether shared identities can reduce political polarization in online environments.
 - **Methods:** Implemented field experiments on X/Twitter using fictitious accounts with randomized political and affective identities; designed and programmed surveys in Qualtrics to assess participants' ability to detect AI-generated profiles; contributed to data analysis and robustness checks.
 - **Contributions:** Supported experimental implementation and analysis that revealed how political and affective alignment increases follow-backs and reduces blocks, with affective effects attenuating when political identity is visible.
- **São Paulo School of Economics (FGV SP)**
• *Research Assistant to Emanuel Ornelas and Daniel Monte* Mar 2024 – Present
 - **Project:** Analyzed the sustainability of rules-based trade regimes under a dynamic model.
 - **Methods:** Implemented stochastic game-theoretic models and conducted dynamic simulations in MATLAB, combining numerical and symbolic computations to study how shifts in global leadership affect institutional stability.
 - **Contributions:** Refined model implementations and contributed to drafting and verifying theoretical proofs.
- **Brazilian Economics Olympiad (OBECON)**
• *Coordinator, Volunteer* Jan 2023 – Present
 - **Leadership:** Led the Academic Team for OBECON, a national competition with 60k+ participants. Built partnerships with major financial institutions including BTG Pactual, B3, Verde Asset, Bain & Company, and Bloomberg.
 - **International Representation:** Served on the International Board representing Brazil at the International Economics Olympiad (IEO).
 - **Achievements:** Guided Brazil to top team placement and fourteen medals at the IEO.
- **São Paulo School of Economics (FGV SP)**
• *Teaching Assistant* Jul 2023 – Sep 2025
 - **Courses:** Supported instruction and grading for undergraduate and graduate courses in econometrics, microeconomics, and mathematics.

SKILLS SUMMARY

- **Languages:** Portuguese (Native), English (TOEFL 102)
- **Programming:** R, Stata, Python, Julia, MATLAB, L^AT_EX, C/C++
- **Software:** Git/GitHub, Excel, PowerPoint, Overleaf, Qualtrics
- **Soft Skills:** Problem solving, teamwork, public speaking

HONORS AND AWARDS

- International Economics Olympiad (IEO) — Individual Gold (8th, 2021; 2nd, 2022); Team Gold Trophy (2021, 2023)
- Brazilian Economics Olympiad (OBECON) — Gold (1st, 2021; 1st, 2022)
